

Integrity:Direct

Integrity:Direct is an age and identity verification service solution that integrates a government-issued ID database check and ID format algorithms. The service provides merchants and government agencies with compliance for age verification laws and guidelines.

Integrity eliminates costs associated with manual intervention, simplifies, automates and streamlines the verification process. Verification information is returned real-time through a cost-effective, web-based solution.

Integrity eliminates costs associated with manual intervention, simplifies, automates and streamlines the verification process. Verification information is returned real-time through a cost-effective, web-based solution.

What are the key benefits of the Integrity:Direct service?

- **Fast.** Process takes under 5 seconds to complete from the time information is submitted.
- **Robust.** US and UK coverage (152 nations total covering over 3.4 billion citizens).
- **Legal.** Complies with US privacy directives and laws.
- **Open.** Not subject to Fair Credit Reporting Act as no credit or medical data is used.
 - **Compatible.** Requires no new hardware and is OS agnostic.
 - **Privacy.** Only a match code is provided to the merchant so the consumer's privacy is protected at all times.
 - **Insured.** Integrity insures transactions against fines imposed on the merchant for underage sales.
 - **Effective.** Now that VISA explicitly prohibits merchants from verifying age by use of its credit card and consistent with credit card association rules, reliable real time verification through a check of government-issued ID databases offers confirmation of a consumer's age with high confidence.
 - **PR Friendly.** Merchants are able to show federal, state and local authorities, public interest groups and concerned parents that they are progressively preventing minors from accessing restricted products, advertising and marketing materials.
